

FRIENDLY LINK

After great efforts you found a supplier in China, you patiently waited a month for an answer, you bargained the price for two weeks and waited one month for the production.

At the end - the container has arrived to the port and the disappointment is huge - you find out the order was only partially completed, the merchandise is defective or carelessly packaged, time and resources went down the drain and the gloom is huge.

Is there another way?

Friendly Link Company offers

 **Cargo Survey Services - prior to leaving the factory**

An assessor on behalf of Friendly Link will arrive at the factory for a survey check; in his possession he will have the details of the order. The assessor will survey the existence of the ordered merchandise, the quality of the packaging and will even spot check the quality of the merchandise.

Upon finishing the survey a report will be turned over to you advising you of the content of the container, the appearance of the packaging, the quality of goods and any other required information.

This way, you will be assured that the container in rout to you is indeed what you had expected.

The sensible way to do business in a global environment
